Objective

Experienced and empathetic UX professional adept at uncovering user needs through diverse research methods. Skilled in crafting visually engaging designs that resonate with users and deliver impactful solutions. Seeking to leverage expertise in a dynamic team environment to create compelling user experiences.

Experience

Insight I Sr. UX Engineer

2018 - 2024

Successfully implemented numerous enhancements to internal experiences through the application of established UX research models. Collaborated closely with developers, engineers, and stakeholders across diverse industries—including healthcare, finance, tech, and retail—to develop comprehensive design systems and products using leading design tools.

Led multiple workshops and interviews to discern requirements for complex challenges, guiding teams in devising short, medium, and long-term solutions for a wide range of clientele.

Directed diverse teams in delivering top-notch, end-to-end experiences, while collaborating closely with sales teams to develop comprehensive Statements of Work (SOWs) and ensure accurate resource allocation.

Cyanna Education I Senior Designer

2016 - 2017

Developed marketing materials, websites, and multimedia videos to facilitate regulatory compliance and guide new education establishments through the educational process.

Radiant Technology I Designer

2013 - 2016

Led a small team of designers to maintain brand standards across various local and regional businesses. Spearheaded the creation of diverse interactive technologies, including video walls and touch panels, while concurrently managing social media presence to enhance brand awareness.

Education

Shawnee State University

Bachelor's of Fine Arts - Interactive Media

2008 - 2012
